

Evaluation of Hardy Fig Varieties in a Northern New England High Tunnel

Saturday, September 19th

3:00 - 5:00pm

Join us on the farm for a free presentation of a two year SARE funded research project to assess the viability of growing figs in a high tunnel in mid-coast Maine. Observe four different varieties of figs that have successfully overwintered in our high tunnel.

Singing Nettle Farm, 138 Woodsong Drive, Brooks, Maine
